

Convincing you how bad London weather is!

Harriet Laing^a

^a *University of Stellenbosch, Cape Town, South Africa*

1. Introduction

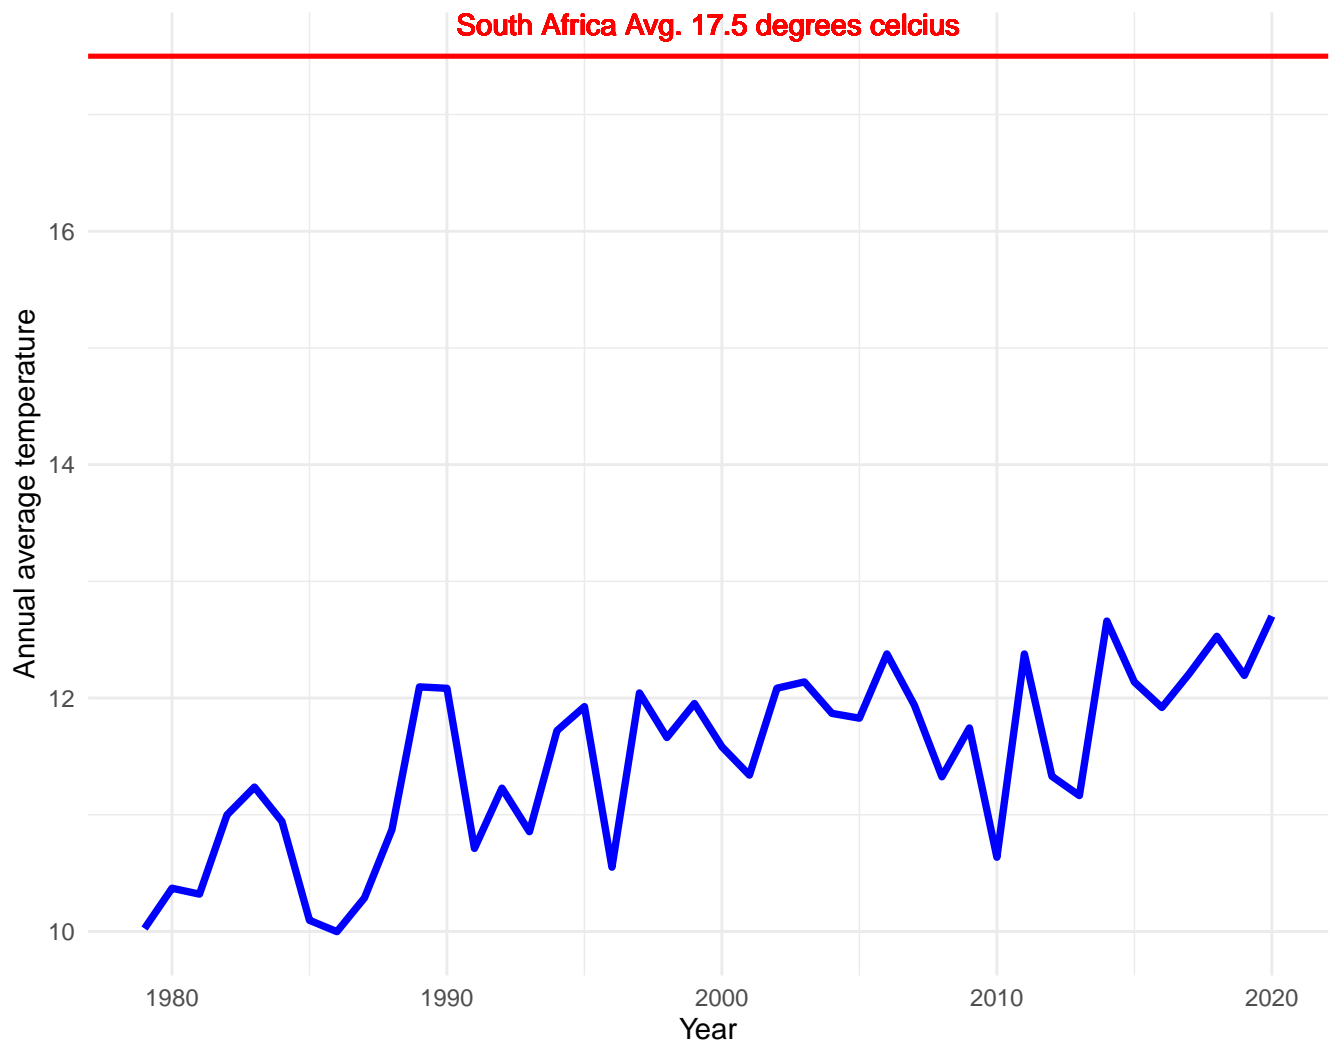

This is just a quick overview of why the weather in London is bad! The average rainfall way exceeds South Africa and the average temperature is way lower! Just look at these figures from the last ten years...

You can see by the annual precipitation that it only came close to South Africa in 2005! And you can see in 2014 it was EXTREMELY high!

Average annual temperatures for London since 1970 with comparison to South Afr

Source: Climate Knowledge Portal, World Bank

Therefore, I am sure you can clearly see how poorly the weather of London looks in comparison to SA! Please do not emigrate...
